Career Objective

Motivated Computer Science student specializing in Artificial Intelligence and Machine Learning seeking internship opportunities to apply programming skills, gain practical industry experience, and contribute to innovative technology solutions.

Education

B.E – Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Jeppiaar Engineering College | 2024 – 2028 | CGPA: 7.0

Technical Skills

- Python (Basics)
- Java (Basics)
- C++ (Basics)
- SQL
- Machine Learning Fundamentals
- Problem Solving

Internship Experience

CodSoft – Software Development Internship (March 2026)

- Worked on programming tasks and development-based assignments.
- Improved coding and problem-solving skills through practical implementation.

InternPe – Internship Program

- Gained exposure to real-world project development.
- Worked on technical learning modules and project execution.

Codec – Internship Program

- Participated in coding and development-based internship activities.

Projects

Diabetes Prediction System

- Developed a machine learning model to predict diabetes using medical dataset inputs.

Car Price Prediction System

- Built a predictive model to estimate car prices using regression techniques.

Certifications

- CodSoft Internship Certificate
- InternPe Internship Certificate
- Multiple College Event Participation Certificates

Leadership & Activities

- Organized multiple events and activities in college.

Languages

English, Tamil, German, Arabic
